

Brand Mark Specification

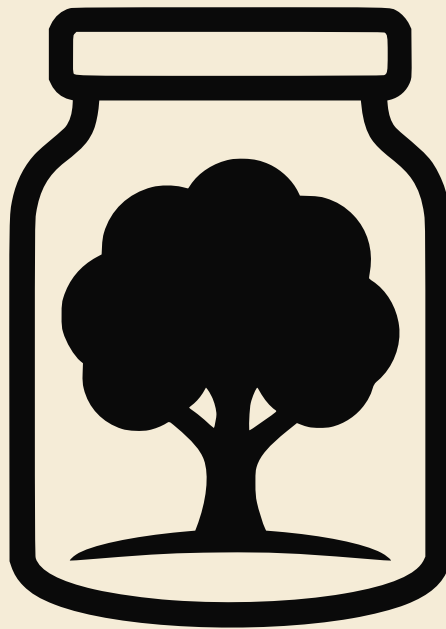

Half an acre is enough. This document governs every reproduction of the brand mark.

Version 1.0

September 2026

Source file: FYR_C14_logo-frasco_1x1_v1.svg

01 The Symbol

A jar holding an orchard — enough, held.

02 Construction and Clear Space

X = the height of the jar lid, which measures 15.6% of the mark's full height.

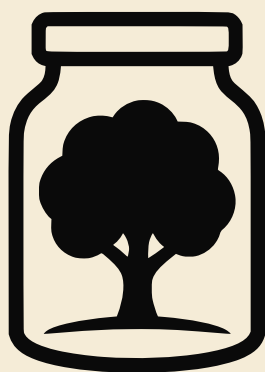

Measured on the source file: the lid spans 145 of the mark's 931 units.

Clear space is X on all four sides. No type, rule, image or edge may enter it.

03 Minimum Size

512 PX

192 PX

64 PX

32 PX

16 PX

Rendered at 100% of stated size. Measure on screen at 100% zoom.

32 px is the minimum size for general use. The single exception is the browser favicon, where the operating system imposes 16 px; at that size the mark reads as a silhouette rather than as a drawing, and this is accepted. Ship 16, 32 and 48 px favicon assets.

20 mm is the smallest print size, measured on the mark's full height.

04 Colour Variants

Root Black on Parchment

#0A0A0A / #F5ECD7

Primary. Use for all print and documents.

Forest on Parchment

#4A7C59 / #F5ECD7

Web headers, packaging, editorial covers.

Terra on Parchment

#D4732A / #F5ECD7

Single-colour stamps and seals only.

Parchment on Forest (reversed)

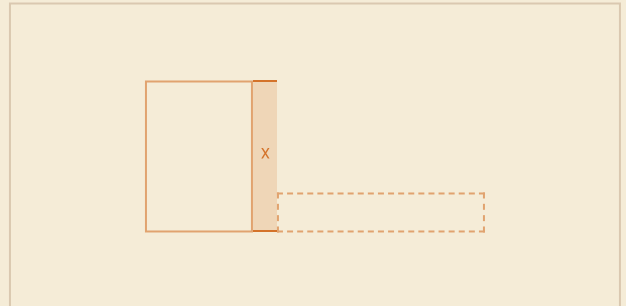

#F5ECD7 / #4A7C59

Dark grounds, apparel, social avatars.

The mark is always one colour. Harvest Gold and Story Brown are never used for the mark.

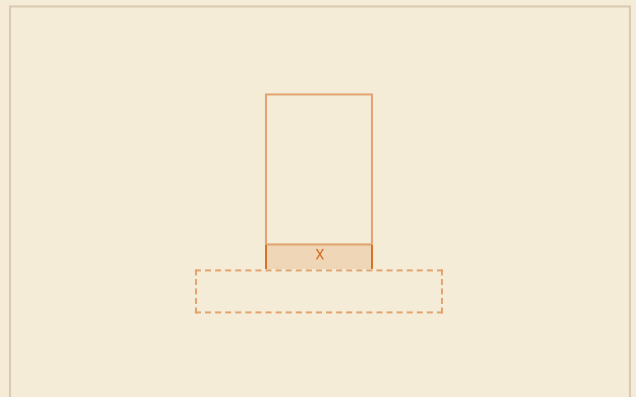

05 Lockups

HORIZONTAL — APPROVED

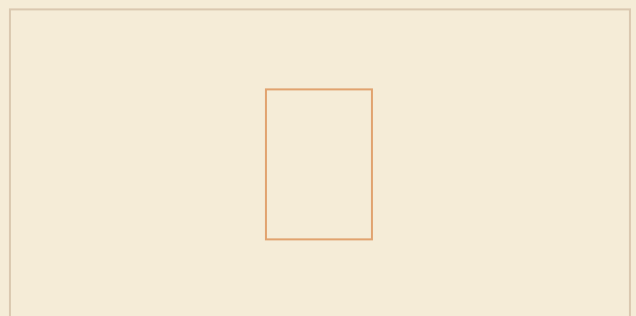

Gap equals one lid-height (X). Wordmark baseline aligns to the jar base.

VERTICAL — APPROVED

Wordmark centred below, separated by one lid-height (X).

SYMBOL ONLY — APPROVED

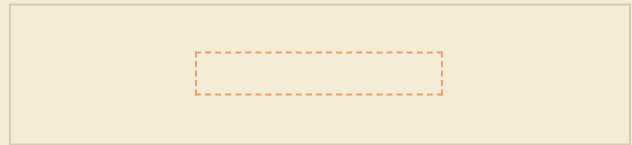

Required for avatars, favicons and any application under 120 px.

The wordmark is never placed inside the jar.

05 Lockups — continued

WORDMARK ONLY (NO SYMBOL) — APPROVED

Wordmark alone, set on the type baseline with no accompanying element.

Used only when the symbol already appears elsewhere in the same piece or context (e.g. the symbol is already in the footer, or appears in the email body). Never as the first brand appearance in a piece — that always uses a lockup or the symbol alone.

Typeface: Playfair Display Bold, same weight and letterforms as the horizontal lockup wordmark — never Satisfy or any script font.

Size: inherits the wordmark size already used in the horizontal lockup for the same context, no separate scale.

No decorative element — no sprout, no underline, no rule.

Same four colour variants as the rest of the system.

Four approved variants in total: horizontal, vertical, symbol only, wordmark only.

06 Misuse

Never stretch. The mark's proportion is fixed at 1 : 1.405 (width : height).

Never rotate. The jar sits level at 0°.

Never add shadow, glow, bevel or gradient.

Never split colour. Tree and jar are always identical.

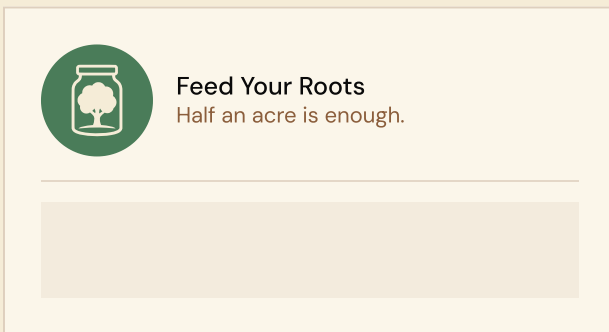

Never place on busy imagery. Use a flat ground.

Never enclose in a badge, ring or frame.

07 Application

SOCIAL PROFILE AVATAR

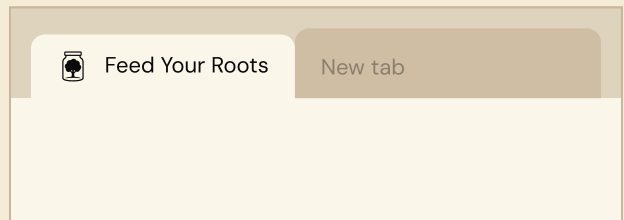

Within a circular avatar, the mark is centred and scaled so that clear space X separates it from the circle edge at its nearest point.

PDF COVER CORNER

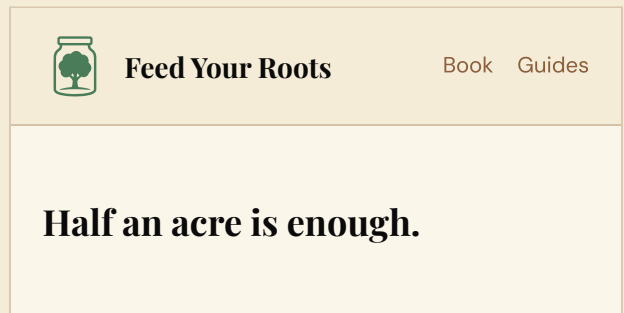

Top-right corner, inset one lid-height from both trims.

BROWSER TAB FAVICON

Root Black at 16 px. Ship 16, 32 and 48 px assets.

WEBSITE HEADER

Forest at 32 px, horizontal lockup, left-aligned.
